

SMALL BUSINESS PROGRAM

Call for Small Business Suppliers

Are you ready to pioneer next generation solutions that make a difference?

Can you answer YES to the following questions?

1. Is your business incorporated in the United States?
2. Does your business meet the small business size standard using the SBA's Table for Small Business Size Standards?
3. Does your business provide any of the products and/or services that we consider from small businesses?
4. Does your business have a history of exceptional performance providing its products and/or services to the DoD, and/or as a subcontractor supporting other large defense contractors?

SMALL BUSINESS OPPORTUNITIES

A MESSAGE FROM OUR SMALL BUSINESS PROGRAM

In our effort to support an ever-increasing customer base, we look forward to sustaining and strengthening the existing supplier relationships that we have, while seizing opportunities to create new business relationships. If your company's products or services support any of the items listed below, we encourage you to register using our Small Business Program website outlined at the bottom of this page.

Energy Systems

- High-Power Neutral Beam Injector Systems
- Electromagnetic Simulations
- Cryogenic Systems
- Vacuum Systems
- Mechanical Systems
- Control Systems
- Plasma Control
- Metrology and Electron Microscopy
- Advanced Diagnostics and Sensors
- Advanced Materials Engineering
- Superconducting Magnets

Defense

- Satellite and Space Systems
- Aircraft launch and recovery systems
- Lithium-ion fault tolerant battery systems
- Aluminum Power Systems
- High Voltage Capacitors
- Electric Motors and Drives
- Modeling and simulation
- Guidance, Navigation, and Control
- Telemetry and Onboard Instrumentation
- Multi-application Guidance Electronic Units (MX-GEU)

Commercial Products

- Advanced Materials
- Deicing Technology
- Advanced Computing
- Capacitors
- Detection & Imaging Products
- Gulftronic Separator Systems
- iSCWO and Hazardous Waste Destruction
- Precision Manufacturing
- Motors, Generators, and Drives
- Automation and Robotics
- Nuclear Fission Technologies
- Medical Isotopes
- High-Power Transmission Systems and Components
- Low-Power Transmission Systems

REGISTERING YOUR SMALL BUSINESS WITH GENERAL ATOMICS

Step 1

Go to:

small-business-program](http://www.ga.com/procurement/small-business-program)

Step 2

Click on the link:
**Small Business
Registration**

Step 3

Fill in
the data entry fields
That's It!

About GA

General Atomics is a San Diego-based innovation firm with more than a half-century of developing successful solutions for energy, environmental and defense challenges. GA specializes in performing innovative research and development and transforming conceptual results into practical systems. General Atomics is a leading provider of unmanned aircraft, airborne surveillance systems, electromagnetic aircraft launch and recovery, satellite surveillance, and next generation nuclear fission and high temperature materials technologies.

GA is the principal private sector participant in thermonuclear fusion research through its internationally recognized DIII-D and inertial confinement programs for the US Department of Energy. For more information, visit www.ga.com
